Journal of Non-Crystalline Solids 106 (1988) ix–xiii
North-Holland, Amsterdam

CONTENTS

Preface vii

Advisory / Organizing Committees viii

Contents ix

Section 1. Diffraction studies of non-crystalline solids

Neutron and X-ray amorphography
Wright, A.C. 1

Synchrotron radiation studies: anomalous scattering, grazing incidence scattering, EXAFS
Bienenstock, A. 17

Intermediate-range order in binary chalcogenide glasses: the first sharp diffraction peak
Susman, S., D.L. Price, K.J. Volin and R.J. Dejus 26

Structure of borate glasses containing Tl and Ba oxide
Yasui, I., H. Hasegawa and Y. Saito 30

The structure of silver/germanium/selenium glass
Dejus, R.J., S. Susman, K.J. Volin, D.L. Price and D.G. Montague 34

Anomalous wide angle X-ray scattering of amorphous Ni_2Zr alloy
De Lima, J.C., J.M. Tonnerre and D. Raoux 38

Amorphous $CuZr_2$ partial distribution functions using the anomalous diffraction technique
Laridjani, M. and J.F. Sadoc 42

The structure of phosphorus selenide glasses
Verrall, D.J., L.F. Gladden and S.R. Elliott 47

The structure of $(Ge_{0.33}S_{0.67})_{1-x}Br_x$ and $(Ge_{0.33}S_{0.67})_{1-x}I_x$ glasses
Wagner, C.N.J., M.S. Boldrick, D. Lee, J. Heo and J.D. Mackenzie 50

Structural relaxation of amorphous $Ni_{32}Pd_{52}P_{16}$ studied by neutron diffraction
Schaal, M., P. Lamparter and S. Steeb 56

The structure of amorphous Ni–Ti alloys prepared by mechanical alloying
Boldrick, M.S., D. Lee and C.N.J. Wagner 60

A neutron diffraction study of amorphous boron using a pulsed source
Delaplane, R.G., U. Dahlborg, W.S. Howells and T. Lundström 66

X-ray diffraction study of $AgI–AgPO_3$ glasses
Musinu, A., G. Piccaluga and G. Pinna 70

Structural properties of amorphous powders prepared by chemical reduction
Corrias, A., G. Licheri, G. Marongiu and G. Paschina 73

A structural study of rapidly quenched glasses in the system $Li_2O–SiO_2$
Umesaki, N., N. Iwamoto, M. Tatsumisago and T. Minami 77

The structure of amorphous $Ni_{50}Ti_{50}$ alloys prepared by proton irradiation and mechanical alloying
Wagner, C.N.J., D. Lee, M.S. Boldrick, J. Cheng, C.-S. Lee and A.J. Ardell 81

Short range order in a binary solid solution: a comparison of the Warren, Bhatia–Thornton and atom – charge formalisms
Wright, A.C. and C.N.J. Wagner 85

Chemical short – range order parameter and ordering enthalpy in binary hard-sphere systems with unequal hard-sphere diameters
Ruppersberg, H. 89
Constraints imposed by $S(k)$–$g(r)$ relationship on general models of condensed matter structure
Baer, S. 92

Section 2. Diffraction studies of liquids

Determination of the topological and chemical short-range order in liquid $Al_{80}(Mn_x(FeCr)_{1-x})_{20}$ alloys
Maret, M., A. Pasturel, C. Senillou, J.M. Dubois and P. Chieux 96
The structural properties of liquid and quenched sulfur
Winter, R., T. Bodensteiner, C. Szornel and P.A. Egelstaff 100
Effective pair potential for liquid iron near the melting point from low-angle structure factors
Arai, T., I. Yokoyama and Y. Waseda 104
Atomic and electronic structure of liquid As
Gaspard, J.P., R. Bellisent, C. Bergman, C. Bichara, A. Pellegatti and R. Ceolin 108
Medium-range order in liquids: interactions in supercooled electrolyte solutions (system $Zn(NO_3)_2$–DMSO)
Červinka, L. and Z. Melichar 112

Section 3. Inelastic neutron scattering

Phonon spectra of vitreous B_2O_3
Hannon, A.C., R.N. Sinclair, J.A. Blackman, A.C. Wright and F.L. Galeener 116
A neutron inelastic scattering study of intermediate range order and low energy excitations in vitreous Ge_xSe_{1-x} alloys
Gladden, L.F., S.R. Elliott, R.N. Sinclair and A.C. Wright 120
Characterization of network vibrational modes by means of dynamic structure factors from neutron scattering
Price, D.L., S. Susman, K.J. Volin and R.J. Dejus 124
Short range order variations in amorphous silicon
Fortner, J. and J.S. Lannin 128
The environment of Ca ions in silicate glasses
Eckersley, M.C., P.H. Gaskell, A.C. Barnes and P. Chieux 132

Section 4. Small-angle scattering

Small angle X-ray and neutron scattering for the investigation of the medium-range structure of metallic glasses
Lamparter, P. and S. Steeb 137
Structural study of aluminosilicate sols and gels by small angle X-ray and neutron scattering
Pouxviel, J.C., J.P. Boilot, M. Smaihi and A. Dauger 147
Enhanced phase separation after annealing of neutron-irradiated amorphous $Fe_{40}Ni_{40}P_{20}$ – a small angle neutron scattering study
Gerling, R., F.P. Schimansky and R. Wagner 153
SAXS study of isothermal sintering of silica aerogel
Lours, T., J. Zarzycki, A.F. Craievich, M.A. Aegerter and D.I. Dos Santos 157
Fractal structure of base catalyzed and densified silica aerogels
Vacher, R., T. Woignier, J. Phalippou, J. Pelous and E. Courtens 161

Section 5. EXAFS

Structural investigation of icosahedral AlGeMn alloy by EXAFS
Sadoc, A. 166
Spectroscopic characterization of sol–gel processing
Babonneau, F., C. Sanchez and J. Livage 170
EXAFS determination of the Fe and Zr environments in amorphous $Fe_{31}Zr_{69}$
Sadoc, A. and G. Chouteau 174
EXAFS study of atomic structure and relaxation phenomena in amorphous $Tb_{20}Fe_{80}$
Samant, M.G., C.J. Robinson, E.E. Marinero and G.S. Cargill III 178
EXAFS study of the coordination of phosphorus in $AgPO_3$ glass
Dalba, G., P. Fornasini, F. Rocca, P. Lagarde and G. Vlaic 181
EXAFS-studies of amorphous rare-earth transition metal oxides
Niemann, H., A. Torkler, W. Gunsser and W. Niemann 185
Photostructural changes in bulk chalgogenide glasses: an EXAFS study
Gladden, L.F., S.R. Elliott and G.N. Greaves 189

Section 6. Quasicrystals

Quasiperiodic structures: experiments and models
Janot, C. and J.-M. Dubois 193
Local structural incompatibilities in amorphous, quasicrystalline and crystalline solids
Egami, T. 207
A direct method to determine quasicrystal structure with neutron diffraction
De Boissieu, M., J. Pannetier, Ch. Janot and J.M. Dubois 211
Pair distance distributions in icosahedral phases
Dubois, J.-M., M. de Boissieu, C. Janot, B. Dubost, R. Fruchart and M. Audier 217
Amorphous NiB seen as a disordered quasicrystal
Sietsma, J. and B.J. Thijsse 221
Validity of the icosahedral glass model for quasicrystalline alloys
Robertson, J.L. 225

Section 7. Effect of preparation on structure

Effect of projectile mass on amorphization of CuTi
Koike, J., P.R. Okamoto and M. Meshii 230
Nd-doped silica glass I: structural evolution in the sol–gel state
Pope, E.J.A. and J.D. Mackenzie 236
Structural evolution of sol–gel systems through viscosity measurement
Xu, R., E.J.A. Pope and J.D. Mackenzie 242
Reversible changes of excess volume in amorphous alloys with consequences for ductile behaviour
Schimansky, F.P., R. Gerling and R. Wagner 246
An investigation of medium – range ordering and the orientational proximity effect in amorphous germanium by high resolution transmission electron microscopy
Gaskell, P.H. and A. Saeed 250
Structural concepts on new amorphous covalent solids
Sorraru, G.D., F. Babonneau and J.D. Mackenzie 256

Section 8. Theory

Percolation in Penrose tiling and its dual
Yonezawa, F., S. Sakamoto, K. Aoki, S. Nosé and M. Hori 262
Ab-initio calculations of the atomic and electronic structure of metallic glasses
Hafner, J., M. Tegze and S.S. Jaswal 270
Polytopes, non-crystalline structures and their diffractions
Sadoc, J.F., N. Rivier and R. Mosseri 274
Topology and ring statistics in covalent glasses
Rivier, N. 278
The local geometry of disorder
Rivier, N. and J.F. Sadoc 282
Statistical thermodynamical study of medium range order
Fujita, F.E. 286

Section 9. Modeling of structure

Medium-range order in amorphous materials
Červinka, L. 291
Rings, intermediate-range order and vibrational spectra of chalcogenide glasses
Vashishta, P., R.K. Kalia and I. Ebbsjö 301
$SiSe_2$ glass: a molecular dynamics study
Antonio, G.A., R.K. Kalia and P. Vashishta 305
The phase structure of aperiodic SiO_2 as a function of network topology
Marians, C.S. and L.W. Hobbs 309
Characterization of medium- and long-range structure with the connectivity matrix
Shackelford, J.F. and B.D. Brown 313
Characterization of SiO_2 surfaces as a function of network connectivity
Marians, C.S. and L.W. Hobbs 317
HNC theory of medium-range order in glasses
Iyetomi, H., P. Vashishta and R.K. Kalia 321
Structural modeling of the $ZrF_4 - BaF_2$ binary using molecular dynamics
Simmons, J.H., G. O'Rear, T.P. Swiler and A.C. Wright 325
Calculation of the scattering properties of a computer-relaxed 614 atom Bell and Dean SiO_2 network
Robertson, J.L. and S.C. Moss 330
Generation of fractal structures by negative pressure rupturing of SiO_2 glass
Kieffer, J. and C.A. Angell 336
A study of intermolecular ordering of banana-like and linear chains in amorphous polycarbonate
Červinka, L. and E.W. Fischer 343

Section 10. Spectroscopy

Vibrational spectroscopy of glasses
Almeida, R.M. 347
Effects of temperature and composition on silicate glass structure and dynamics: Si-29 NMR results
Stebbins, J.F. 359
Boron carbides: evidence for molecular level disorder
Tallant, D.R., T.L. Aselage, A.N. Campbell and D. Emin 370

Dispersive diffusions transport of radiolytic atomic hydrogen in high purity SiO_2:OH glass
Tsai, T.E. and L. Griscom 374
The effects of tensile stress on the Raman spectrum of silica glass
Tallant, D.R., T.A. Michalske and W.L. Smith 380
Low-frequency Raman spectra of thermally treated silica gels
Maritto, G., M. Montagna, G. Valiani, R. Campostrini and G. Carturan 384
Structural characteristics of GD a-Si(S,O):H films
Han, G., Z.Jiang and Z. Ding 388
Structural change of soda lime glass with minor P_2O_5 addition and heat treatment
Lu, Y., Z. Ding and Y. Tang 391
Mössbauer spectroscopy in amorphous metals: failures and successes
Gonser, U., C.T. Limbach and F. Aubertin 395
Controlled quenching and phase formation
Limbach, C.T. and U. Gonser 399
An MAS NMR study of network–cation coordination in phosphosilicate glasses
Dupree, R., D. Holland, M.G. Mortuza, J.A. Collins and M.W.G. Lockyer 403
NMR determinations of Si – O – Si bond angle distributions in silica
Pettifer, R.F., R. Dupree, I. Farnan and U. Sternberg 408
Magnetic resonance studies of neutron irradiated quartz and amorphous silica
Chan, S.L., L.G. Gladden and S.R. Elliott 413
NMR studies of chalcogenide glasses: the system phosphorus–selenium
Lathrop, D. and H. Eckert 417

List of Participants 421
Author index 425
Subject index 430
